BIOCHEMISTRY

ANTI STREPTOLYSIN O QUANTITATIVE SERUM

ASO 56.0 < 200 IU/ML

Specimen:
SERUM

*

Interpretation: Immunochemical assay of specific antibodies to streptococcal metabolites provides valuable information regarding past streptococcal infection (rheumatic fever, scarlet fever, tonsillitis, glomerulonephritis).

Interfering Factor: In the case of monoclonal gammopathies (e.g. Waldenstroms macroglobulinaemia) the measurements yield false highly elevated ASO concentrations in some patients. Such samples should be assayed by another method.
